- To optimize for latency and find the best servers for your IE Tab sessions, and like most web sites we log the IP address and corresponding geographic location from which your session was initiated.

5. HOW DO WE KEEP YOUR INFORMATION SAFE?

In Short: We aim to protect your personal information through a system of organizational and technical security measures.

We have implemented appropriate technical and organizational security measures designed to protect the security of any personal information we process.

Specifically, in the case of IE Tab for non-Windows solutions we create a new and unique user account for each user session. All cache and / or browsing information is only available to that user account and only your unique sign-in has access to that account.

We use the wss protocol to communicate with the individual browsing session which is a cryptographic standard to prevent man-in-the-middle attacks.

When your session is complete we destroy the entire user account and all data associated with it.
